

**PEGNL Professional Development Short Course**

**Wednesday, October 31, 2018, Harbourview Ballroom**

**Till Indicator Mineralogy & Geochemistry: Effective Methodology for Gold and Base Metal Exploration.**

Presented by Michael D.J. Michaud and David Hozjan, Overburden Drilling Management Limited

*This short course will present the fundamental principles of an effective glacial till survey covering topics such as: survey design and implementation, sample processing, analysis and data interpretation. Several case studies from discoveries in Newfoundland and across Canada will also be presented.*

**Commercial Geochemical Analyses – Are You Getting What You Need?**

Presented by Dr. Stephen Amor, Geological Survey Division, NL Department of Natural Resources

*This short course will describe the sample-preparation, digestion (where applicable) and analytical methods available to the explorationist, why one may be more suitable than another, and the need not to mix 'apples and oranges'. Quality assurance will also be touched on.*
