## CONTENTS

### REGIONAL GEOLOGY

1. **W.L. Dickson, V.J. McNicoll, G.S. Nowlan and G.R. Dunning**  The Indian Islands Group and its relationships to adjacent units: Recent data. .......................................................... 1

2. **C.F. Gower**  Protolith recognition of metamorphosed felsic volcanic/volcaniclastic rocks, with special reference to the Grenville Province in southeast Labrador. .......................................................... 11

3. **A.M. Hinchey**  The Paleoproterozoic metavolcanic, metasedimentary and igneous rocks of the Aillik domain, Makkovik Province (NTS map area 13O/03). .......................................................... 25

4. **I. Knight**  Geological studies in the Lomond (NTS 12H/5) and adjacent map areas of the eastern part of the Goose Arm Thrust Stack, western Newfoundland. .......................................................... 45

5. **I. Knight, K. Azmy, M.G. Green and D. Lavoie**  Lithostratigraphic setting of diagenetic, isotopic, and geochemistry studies of Ibexian and Whitrockian carbonate rocks of the St. George and Table Head groups, western Newfoundland. .......................................................... 55

### MINERAL DEPOSITS

8. **J.G. Hinchey**  Volcanogenic massive sulphides of the southern Tulks Volcanic Belt, central Newfoundland: Preliminary findings and overview of styles and environments of mineralization. .......................................................... 117

9. **A. Kerr**  Mafic igneous rocks in western Labrador: A regional assessment of potential for magmatic Ni-Cu ± PGE mineralization. .......................................................... 145

10. **S.J. Piercey**  Volcanogenic massive sulphide (VMS) deposits of the Newfoundland Appalachians: An overview of their setting, classification, grade-tonnage data and unresolved questions. .......................................................... 169

11. **G.W. Sparkes, S.J. O’Brien and G.R. Dunning**  Preliminary notes on some geochemical characteristics of plutonic and volcanic suites in the region between Manuels and Cape St. Francis, Avalon Peninsula, eastern Newfoundland. .......................................................... 179

### GEOCHEMISTRY, GEOPHYSICS AND TERRAIN SCIENCES

12. **M.J. Batterson and D.M. Taylor**  Till geochemical surveys and preliminary Quaternary mapping of the Burin Peninsula and adjacent areas. .......................................................... 197

13. **D. Brushett, T. Bell, M.J. Batterson and J. Shaw**  Ice-flow history of Placentia Bay, Newfoundland: Multibeam seabed mapping. .......................................................... 215
GENERAL TOPICS

14. A. Harris and S. Cochrane  Core-storage program, 2006. .............................................. 229

15. C. Patey and C. Saunders  Documents and databases at the Geoscience Publications and Information Section. ................................................................. 235
