

# Newfoundland and Labrador: Resource Rich – Investment Ready

- Canada's easternmost province, strategically located in the North Atlantic.
- Very Diverse Geology and Mineral Endowment
- Today's talk will focus on Iron Ore and Fluorspar

# The Labrador Trough: World-class iron ore district

Infrastructure in place: rail, deep-sea port and hydroelectric power

The current depressed markets provides a unique opportunity for new investment within this district

# FLUORSPAR

Canada Fluorspar Inc. is developing a new fluorspar mine in a historic mining district.

Identified a new mineralized environment with potential for expansion and additional discoveries

Inferred and indicated resource > 22 M tonnes

Projected 30 year open pit mine life with first production this year.

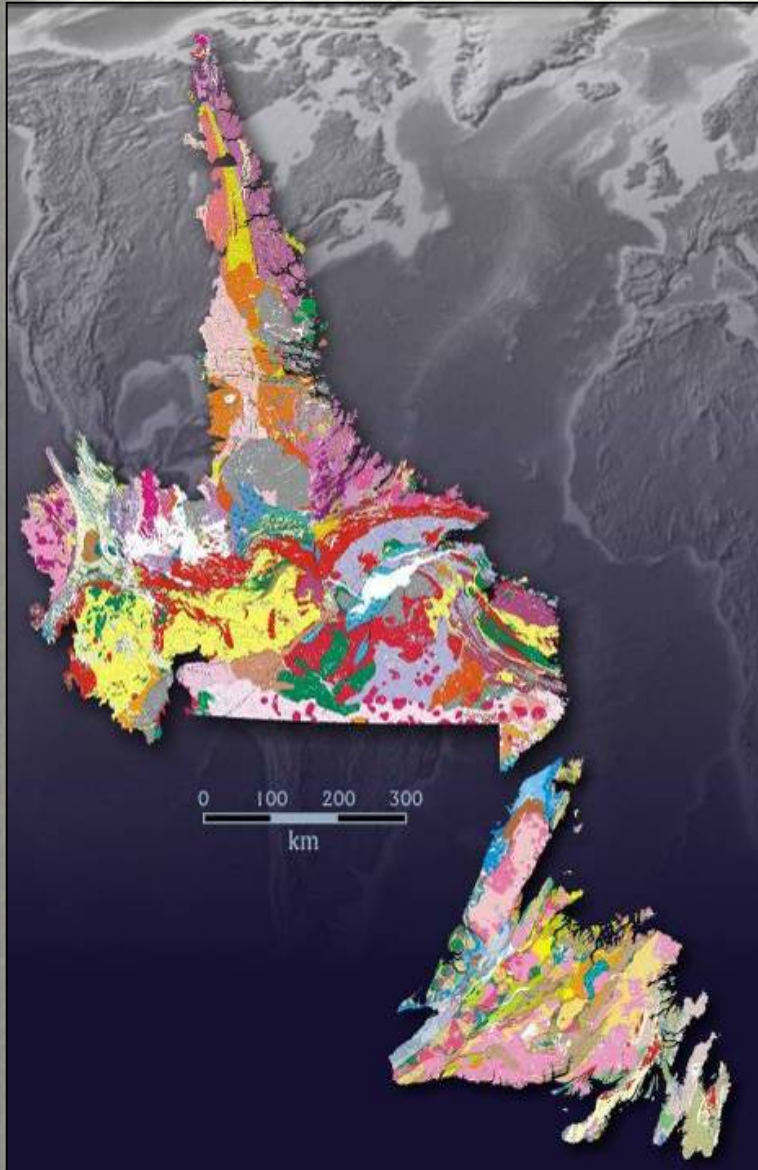

Very high quality product with annual production slated to be 200,00 tonnes of acid-grade product.

Buyers are sought for this high-quality product.

Company representatives are at the Conference.

# Thank You!

## Newfoundland and Labrador: Open for Business and Primed for Discovery!

- Iron ore
- Nickel-copper
- Copper-lead-zinc-silver
- Gold
- Antimony
- Uranium
- Fluorspar
- Molybdenum-tungsten
- Rare earth metals
