LIST OF GOLD PROJECTS (COMPANY)

Brady - Reid Porphyry Zone (Silvertip Exploration Consultants Inc.)

Cape Ray (Matador Mining Limited)

Glover Island (Mountain Lake Minerals Inc.)

Golden Promise – Jaclyn Zone (Great Atlantic Resources Corp.)

Green Bay (Maritime Resources Corp.)

Hope Brook (First Mining Gold Corp.)

Huxter Lane – Mosquito Hill (R. and L. Quinlan)

Rattling Brook (Anaconda Mining Inc.)

Valentine Lake (Marathon Gold Corp.)

Viking – Thor Trend (Anaconda Mining Inc.)
Company: **Silvertip Exploration Consultants Inc.**

**Project:** Brady (Reid Porphyry Zone) - **Gold**

**Status:** Non-Producer

**Stage:** Exploration, **Resource Estimate**, Feasibility, Development

**Contact:** [Spencer Vatcher](#) (President)

The Brady property is adjacent to the Huxter-Lane property and is host to the Reid Porphyry Zone, a bulk-tonnage intrusion-hosted gold deposit. It is estimated that the zone contains an **Inferred Resource** of 5,990,000 tonnes averaging 0.558 g/t Au for 107,461 ounces.

During the winter of 2011, a 6-hole diamond-drill program expanded the footprint of the Reid Porphyry Zone to the south. The deposit remains open for expansion.

Matador acquired the mineral rights to the Cape Ray Project in 2018. The company has updated the resource estimates for the 04, 41, 51 Zones, and Window Glass Hill Deposits, and has completed initial estimates for the Isle aux Mort and Big Pond deposits. Matador is conducting an extensive program of data compilation, regional geochemical sampling, re-logging and sampling of historical drill core, and diamond drilling, with the objective if increasing the resource base.

Mountain Lake owns a 100% interest in the Glover Island Property. The Property hosts 16 mineral prospects along a >11 km strike length known as the Glover Island Trend. All but one of the prospects remain significantly underexplored, and 13 of those prospects include high-grade gold targets.

Mountain Lake completed its Phase 1 drilling program in early 2012 that culminated in a 43-101 mineral resource estimation for the Glover Island Project. A new Resource Estimate was released in 2017.

**Company:** [Great Atlantic Resources Corp.](#)

**Project:** Golden Promise (Jaclyn Zone) - **Gold**

**Status:** Non-Producer

**Stage:** Exploration, **Resource Estimate**, Feasibility, Development

**Contact:** [Christopher R. Anderson](#) (President, CEO and Director)

The property contains the Jaclyn zone, a composite mesothermal gold vein system. The zone is defined over a strike length of 800 m and to a depth of 275 m and remains open for expansion along strike and to depth.

The Jaclyn Main Zone contains an **Inferred Resource** of 921,000 tonnes averaging 3.02 g/t Au (89,500 contained ounces). Bulk sampling reported in 2011 indicated a 26% increase in grade over the block model used for the resource estimate.

TSX.V: MAE

Company: Maritime Resources Corp.

Project: Green Bay - Gold

Status: Non-Producer, Former Producer

Status: Exploration, Resource Estimate, Feasibility, Development

Contact: Doug Fulcher (President, Chief Executive Officer and Director)

There are four known gold deposits on the Green Bay Property. Of these, the Orion deposit contains a Measured and Indicated resource of 1,096,000 tonnes grading 4.47 g/t Au and Hammerdown/Rumbullion contains a Measured and Indicated resource of 727,500 tonnes grading 11.59 g/t Au.

Maritime has completed a prefeasibility study on the former-producing Hammerdown Mine and has signed a nonbinding Letter of Intent with Rambler Metals and Mining Canada Limited for a toll-milling agreement to process ore from Hammerdown at Rambler's Nugget Pond mill.

First Mining is exploring around the margins of the former Hope Brook Gold Mine, a high-sulphidation epithermal gold deposit which produced 752,163 ounces of gold plus a copper concentrate from an open pit between 1993 and 1997.

A high grade underground Resource Estimate for the project was published in January, 2015. This new resource, targeted for potential underground development, lists 5,500,000 tonnes grading 4.77 g/t Au containing 844,000 ounces gold in the indicated category and 836,000 tonnes at 4.11 g/t Au containing 110,000 ounces gold in the inferred category.

Owner: R. and L. Quinlan

Project: Huxter Lane (Mosquito Hill) - **Gold**

Status: Non-Producer

Stage: Exploration, **Resource Estimate**, Feasibility, Development

Contact: Quinlan, Roland

The Mosquito Hill and nearby Brady deposits (see Brady Project Sheet) are large, intrusion-hosted deposits with bulk tonnage potential. The Mosquito Hill deposit contains an **Indicated Resource** of 11,180,000 tonnes averaging 0.546 g/t Au for 196,257 ounces, and an Inferred Resource of 38.76 million tonnes averaging 0.457 g/t Au for 569,496 ounces.

In late 2011, a 7 hole, 1553 m diamond-drill program expanded the mineralization to the southwest where the deposit remains open.

See also: [Summary of Gold Deposits of Newfoundland](#)
The project contains three main gold deposits: Road, Apsy and Beaver Dam zones. The Road and Apsy zones are intrusion-hosted deposits with bulk tonnage potential. The Beaver Dam zone is a stratabound, sediment-hosted deposit.

The project contains a combined Inferred Resource of 18,310,000 tonnes at an average grade of 0.84 g/t Au based on 183 diamond drill holes completed between 1986 and 2007.

Company: Marathon Gold Corp.

Project: Valentine Lake Camp - Gold

Status: Non-Producer

Stage: Exploration, Resource Estimate, Feasibility, Development

Contact: Phil Walford (President and CEO)

In 2018, Marathon published an updated Preliminary Economic Assessment of its Valentine Lake Project with improved economics and a projected 44% increase in recovered gold. The study contains a Measured and Indicated Resource of 45,146,000 tonnes grading 1.854 g/t Au for a total of 2,691,400 ounces. The Inferred Resource is 26,857,000 tonnes grading 1.774 g/t Au for an estimated 1,531,600 ounces.

Valentine Lake now hosts the largest gold resource in Atlantic Canada. All the deposits remain open in one or more directions. Marathon Gold is continuing its aggressive drilling program to expand the known deposits and to explore for new deposits along the 30 km gold trend it controls.

Anaconda Mining Inc. acquired the Viking gold property from Spruce Ridge Resources in 2016. The Viking Project is host to the Thor gold deposit which contains an Indicated Mineral Resource of 83,000 ounces of gold (1,817,000 tonnes at an average grade of 1.42 g/t Au) and an Inferred Mineral Resource of 31,000 ounces of gold (847,000 tonnes at an average grade of 1.15 g/t Au) at a cut-off grade of 0.5 g/t.
